

# TECHNOLOGY AND SERVICE FOR COMBINED HEAT & POWER SYSTEMS

**Martin Energy Group Services, LLC** manufactures CHP power generation systems to UL and ASME standards with full capabilities for factory testing and verification. We design and package all types of power generating systems – from standby power to continuous, high-demand applications.

As a leader in the Combined Heat & Power industry, **Martin Energy Group Services, LLC** is dedicated to providing service above and beyond the expectations of their customers. We understand the customer's most important purchase decision should include not only the quality of the product, but also the benefits of after-sales support for their power generation equipment.

**Martin Energy Group Services, LLC** technicians are fully trained to operate the diagnostic and service equipment for CHP power systems. We are fully supplied with the proper tools to repair and test CHP equipment of all sizes, makes, and models.
